Intracerebral hemorrhage. During a stroke part of the brain is deprived of blood. Cigarette smoking.

Some people need a long period of rehabilitation before they can recover their

About 10 percent of all strokes in the United States occur among people 18 to 50 years old. Even if all the symptoms resolve, it is very important that anyone experiencing these symptoms call and immediately be evaluated by a qualified physician. Today, more and more Americans are protecting their most important asset—their brain.

And in fact, they often are affected by atherosclerosis. So you'd have a pretty let's actually just look at the left atrium here, because that's the one that's relevant for stroke. This may occur later, especially in cigarette smokers.
