The three towns Futaba, Namie and Tomioka near the Fukushima nuclear power plant have become ghost towns, and tens of thousands of people have left their homes. See Article History.

Many countries including 14 European states as well as Japan [12] announced. The government emphasized that radiation level was relatively low and posed no threat to health. Melted material fell to the bottom of the containment vessels in reactors 1 and 2 and bored sizable holes in the floor of each vessel—a fact that emerged in late May. The government didn't want Fukushima Nuclear Catastrophe put the elderly residents through the ordeal of an evacuation.

This will partly compensate for the decommissioning of the Fukushima Daiichi. The government gets Fukushima Nuclear Catastrophe a car to be driven to Iitate. US experts with the Nuclear Regulation Commission NRC recommended to the Japanese rescue management to fill up the reactors with nitrogen to prevent possible new hydrogen explosions inside the containment [65].
